

## Camino Modular Benches

Camino is a modular bench collection designed to create vibrant outdoor gathering spaces. Connecting benches enables architectural scalability. Optional integrated lighting illuminates outdoor evening activities. Made in Port Orchard, WA, Camino is constructed from powder-coated steel and domestically sourced thermally modified hardwood.

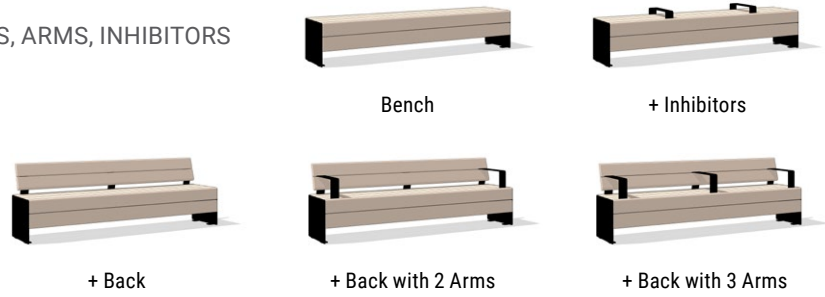

We offer a variety of tools to design with Camino. The **Camino Design Guide** includes a set of configurations that are available to download and use in projects. Learn more at [tournesol.com/camino](https://tournesol.com/camino).

# Camino Benches

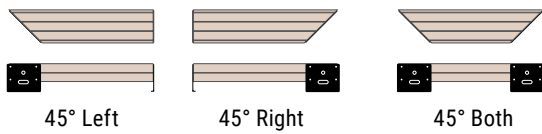

## STRAIGHT BENCHES

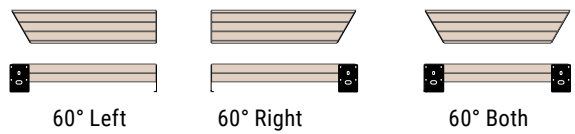

## BACKS, ARMS, INHIBITORS

## 45° BENCHES

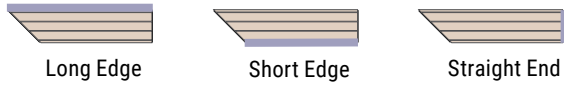

## 60° BENCHES

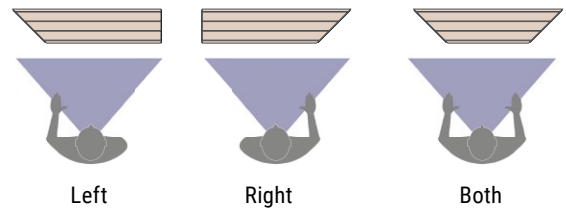

## EDGES & ENDS

Understanding Long vs. Short Edge will make Left vs. Right easier to identify.

## LEFT, RIGHT & BOTH

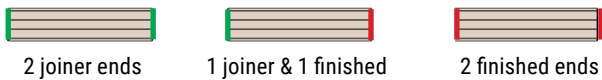

Left and Right benches can be identified by facing the Short Edge of the bench.

## END OPTIONS

In the illustrations below, green represents a joiner end that can be connected to another bench. Red represents a finished end.

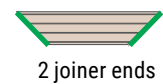

### END OPTIONS: STRAIGHT

### END OPTIONS: 45° or 60° LEFT OR RIGHT

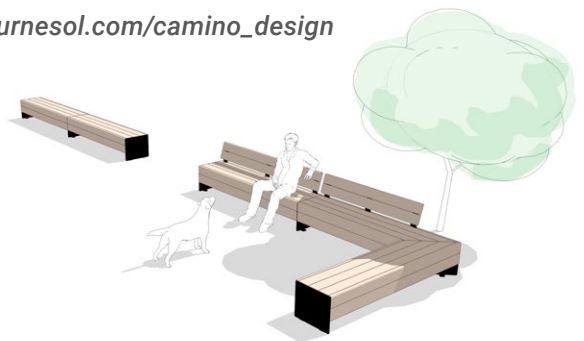

### END OPTIONS: 45° or 60° BOTH

# Camino Lighting

## LED LIGHTING

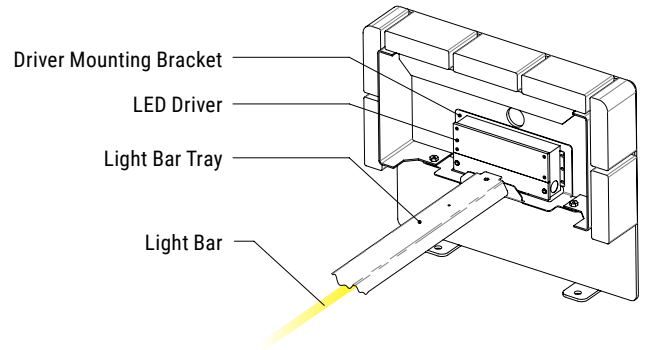

Optional LED Lighting is available for Camino Benches. The system is easy to set up and illuminates nighttime activities. 2700K, UL, wet rated, and DarkSky Approved. For more info, refer to submittal drawing.

## MOUNTING & CONNECTIONS USING JOINER ENDS

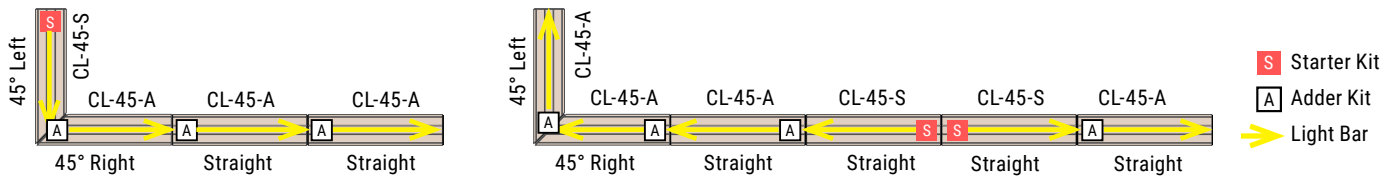

Joiner Ends have openings for fastening bolts, and facilitate the pass through of lighting and electrical connections.

Mounting Brackets for LED Drivers and Light Bar Trays connect to Joiner Ends hidden inside the bench.

## STARTER KITS & ADDER KITS

Begin with a Starter Kit which includes an LED driver, driver mounting bracket, tray, light bar, and connectors. If connecting additional benches, connect up to three Adder Kits. If additional lighting is needed, add a new Starter Kit and continue adding up to three Adder Kits. Starter Kits can be daisy-chained from one power location by running cable through openings in Joiner Ends above Lighting Kits.
