

COLUMNS

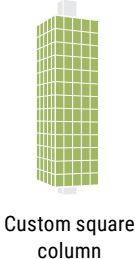

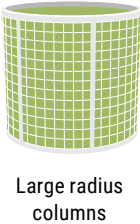

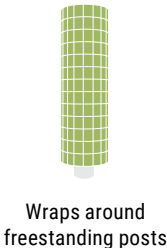

COLUMNS

Bring art to life with trellis that wraps posts, columns, and piers with growing vines. Mounted to wood, metal, or concrete, Greenscreen® curved and square columns can be customized to meet a wide variety of project requirements.

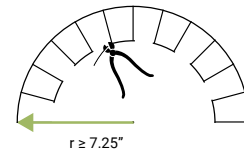

FABRICATING COLUMNS

Greenscreen® panels can be Cut-to-Curve to wrap around columns. When finished with optional trim band and closed using 5131 Flex-C Rings, columns rest on 5132V clips customized to fit a post by others. Our standard 3" post can be supplied if needed for freestanding options.

The most cost-effective standard column uses a single, uncut 48"W panel, which creates a column with a diameter of approximately 15.5". Connect with an Advisor to discuss your column project.

CUT-TO-CURVE

Small sections of the grid panel closest to the structure are removed to allow the necessary shortening of the inner radius.

OPTIONAL TRIM BAND

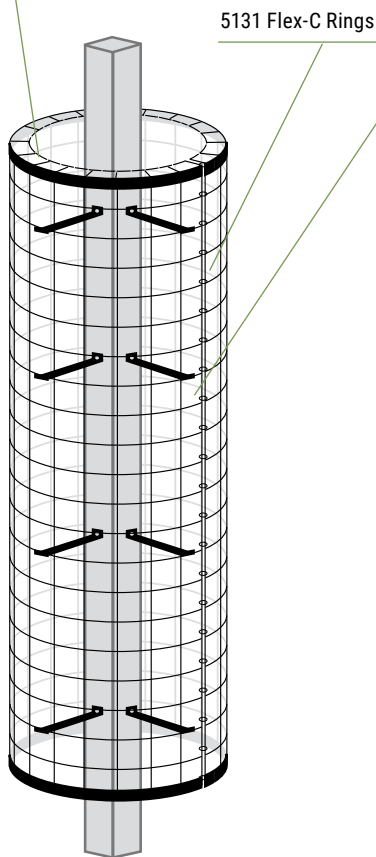

For a finished look, flat trim can be applied to the top and bottom edges.

5132V CLIPS

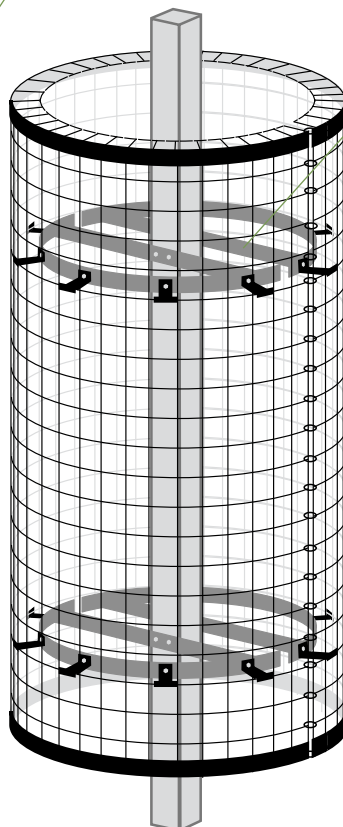

Custom-length 5132V Clips will be fabricated to fit the column radius to the post.

CUSTOM RADIUS BANDS

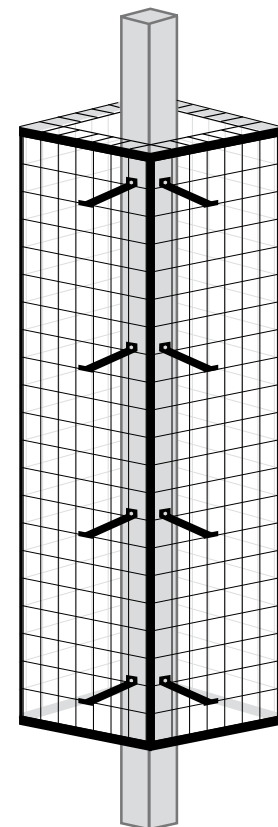

For larger columns, custom radius bands can be attached to the post before clips are attached.
