

Zena Collection

Zena has a pronounced, highly tapered design; its lightweight GFRC concrete is durable for high-traffic locations yet light enough to be moved. Now available in FRP fiberglass, it offers the same sleek, modern profile in an even lighter, low-maintenance material—ideal for rooftops, terraces, or any setting where weight is a consideration.

With a wide rim and a narrow waist, these planters serve as striking focal points while adding a sophisticated edge to urban landscapes. Add curb appeal to any project with our Zena Planters. Elegantly proportioned with tapered bases, this classic design shines whether arranged in pairs, clusters, or as standalone accents.

Zena Collection, GFRC

- Lightweight GFRC concrete planters designed to be durable despite low weight
- Coordinates with our self-watering container irrigation products
- Drain holes standard
- Round planter sizes from 24" to 60"

Zena Collection, GFRC

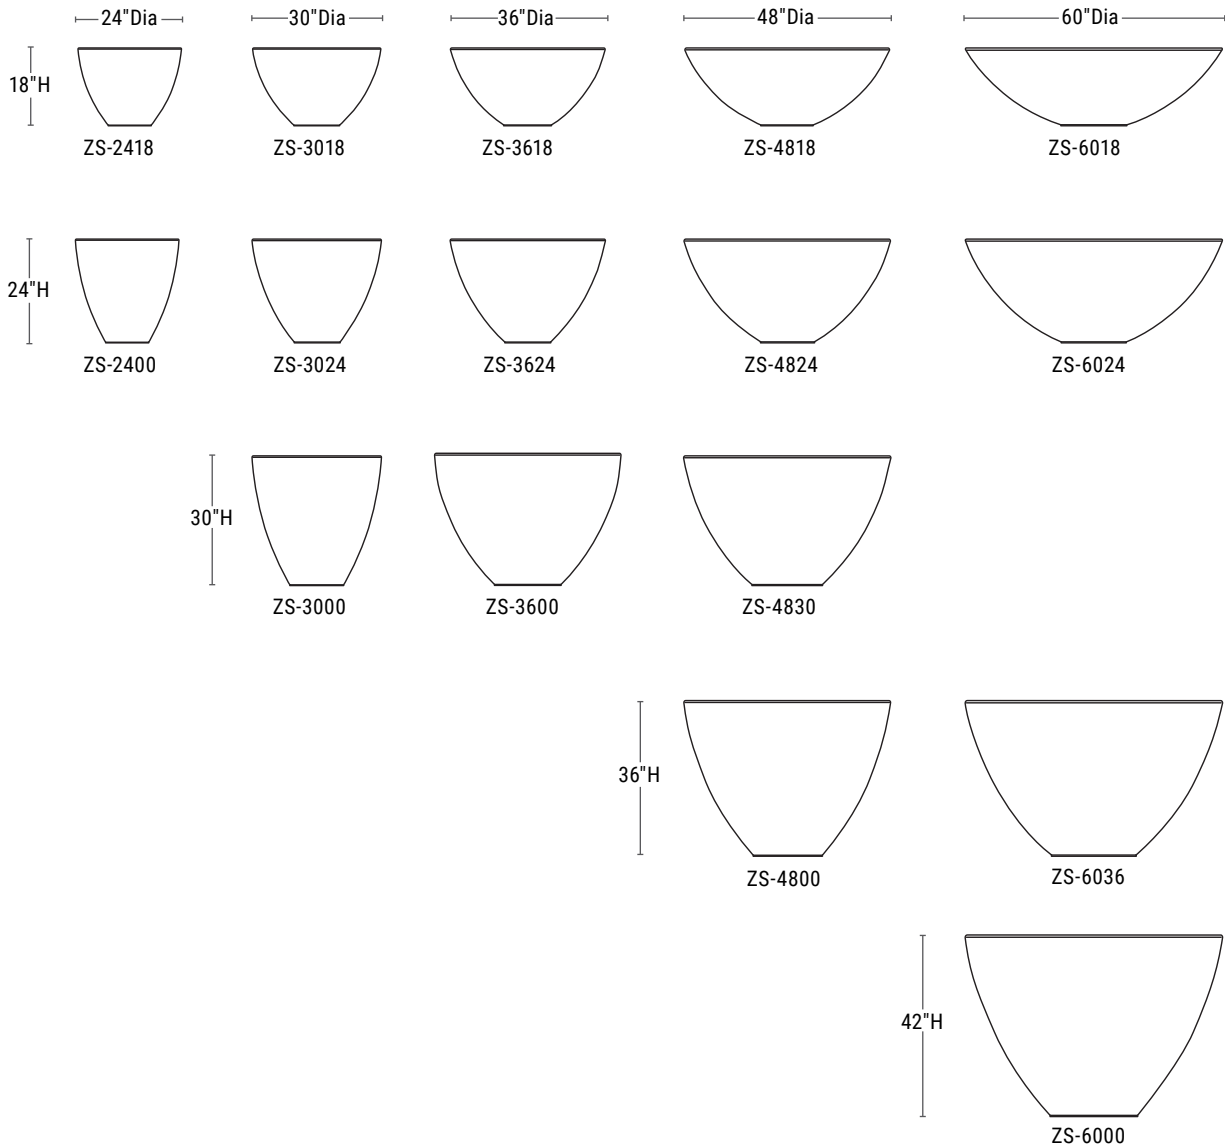

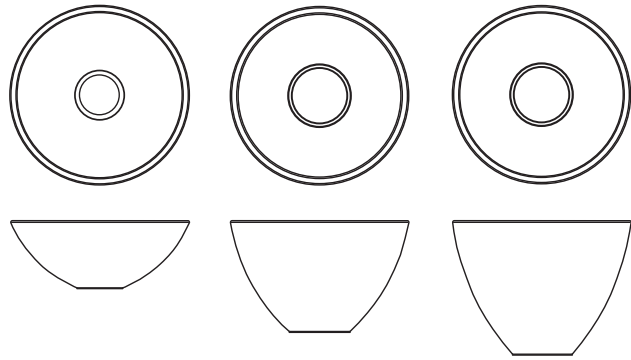

- Lightweight GFRC concrete planters designed to be durable despite low weight
- Coordinates with our self-watering container irrigation products
- Drain holes standard
- Round planter sizes from 24" to 60"
